FOOTPRINT PROJECT

Newsletter 1 – November 2021

The aim of the project

The project “**FOOTPRINT - Building digital media skills to raise climate change awareness among young people**” implemented in the framework of Erasmus+ programme proposes a new approach to promoting solutions to the impact of climate change through the process of filmmaking. Through training programmes, and a suite of educational resources, the FOOTPRINT project offers an interactive, practical, and appealing approach to the topics of building digital skills that actively encourage environmental awareness.

Throughout the course of the FOOTPRINT project, project partners from Poland, Ireland, Spain, Czech Republic, Greece, and Portugal are working with young people and youth workers in each partner country to assess, develop and build key transversal skills and competences needed in today’s modern, digital, and changing society.

First partner meeting

From 2nd to 3rd of June 2021, representatives from Poland, Ireland, Spain, Czech Republic, Greece and Portugal attended the online Kickoff Meeting of the Erasmus+ **FOOTPRINT** project.

The main objectives were to allow a detailed project examination clarifying roles, responsibilities and the scheduling of all activities; (1) project administrative and financial management, (2) quality assurance and quality planning guidelines; (3) agreeing the value proposition for the IO1 and IO2; (4) establishing the principles for engagement of target group members through local working groups; (5) agree the parameters for an effective dissemination strategy; (6) agree a project branding concept and a web architecture framework. Furthermore, the meeting had other goals such as the information exchange about the covid situation in each country and the discussion of different options to organise next meetings and multiplier events in each country.
